PROFESSIONAL SUMMARY

Backend Software Engineer specializing in C# and ASP.NET Core, with hands-on experience building microservices, RESTful APIs, and cross-platform applications. Passionate about system design, performance optimization, and delivering scalable solutions.

EDUCATION

FPT University - Ho Chi Minh City

Sep 2022 - Jun 2026

- Software Engineering - **GPA:** 3.25/4

TECHNICAL SKILLS

- **Languages:** C#, Java, TypeScript, Dart
- **Backend & Database:** ASP.NET Core, EF Core, SignalR, PostgreSQL, SQL Server, MongoDB, RabbitMQ, Redis
- **Frontend & Mobile:** React.js, Next.js, TailwindCSS, HTML5, CSS, Flutter
- **DevOps & Tools:** Docker, GitHub Actions, Git, Postman, Swagger
- **Concepts:** OOP, REST API Design, System Design, Microservices, Database Optimization

EXPERIENCE

Software Engineering Intern (.NET)

Jan 2025 - Jun 2025

FPT Software

Ho Chi Minh, Viet Nam

- Contributed to digitizing internal claim approval workflows across 5+ departments by building an ASP.NET Core claim management system within a 10-member team.
- Designed RESTful API endpoints; contributed to data modeling, schema design, and query optimization improving average response time by 20%.

PROJECTS

- **SnakeAid**  | Teamsize: 5 | Fullstack Developer Jan 2026 - May 2026
 - Cross-platform rescue & medical support system (web, mobile, backend, AI) for snakebite incidents, featuring AI-driven snake identification, first aid guidance, video consultation, and SOS coordination.
 - Implemented real-time rescue workflows and mission tracking using SignalR and push notification (with FCM and RabbitMQ) across mobile (Flutter) and web (Next.js).
 - Developed snake species library and first-aid recommendation features for emergency support workflows.
 - Contributed to data modeling, and query optimization for scalability and reliability.
 - **Technologies:** ASP.NET Core, SignalR, PostgreSQL, Next.js, TailwindCSS, Flutter, FastAPI, FCM, RabbitMQ, LiveKit, Docker
- **AlohaMarket**  | Teamsize: 5 | Fullstack Developer Aug 2025 - Oct 2025
 - Built a microservices-based marketplace platform for buying and selling second-hand items using .NET Aspire.
 - Designed and developed 8 independent microservices with YARP API Gateway and service discovery for scalable service-to-service communication.

- Improved scalability and data isolation by applying database-per-service pattern with PostgreSQL, MongoDB, and EF Core; integrated real-time buyer-seller chat via SignalR.
- **Technologies:** ASP.NET Core, .NET Aspire, YARP, SignalR, PostgreSQL, MongoDB, React.js

ACHIEVEMENT

- **Bronze Prize**, City-Level Excellent Student Competition in Informatics 2021
- **30% Academic Scholarship**, FPT University 2022

LANGUAGES

- English - B2 CEFR
- Japanese - N5 JLPT

CERTIFICATIONS

- Microsoft Back-End Developer Specialization — Microsoft Dec 2025
- IBM Full Stack Software Developer Specialization — IBM Sep 2025
- Foundations of Data Structures and Algorithms — University of Colorado Boulder Sep 2025
